Our dedication to providing quality and service that is second to none, to all, is a direct reflection of the increasing expectations of our customers. As demands grow so does our commitment to excellence.

Ever tightening deadlines require the need to be right and on time - a principle that is kept central to our core aims. In order to achieve the best, the highest quality machinery is utilised - procured from around the world.

Our on site processing department includes a 4000 x 1600mm Toughening Furnace, a 4000 x 2000mm EVA Laminating Line, Fully Automatic Shaped Cutting, CNC Glass Processors, Fully Automated Straight Line Edgers, Semi Automatic Drilling - all capable of processing glass up to 19mm thick. In addition our automatic laminated cutting facilities with a cutting bridge of 4600mm will slice through shopfront glass that is essential to consumers and insurance companies alike. All of which is supported by people with a desire to be the best and the experience to provide it.

Through innovation Forge Glass offers a wide range of expertise at all levels from inception to delivery via our bespoke built road fleet.
